# Apple – iOS 16-

If using an older version of iOS, go to "Settings", then "Passwords & Accounts", then select the Farmside account

Once in the account settings, change the SMTP server first.

1. Select SMTP
2. Select the Primary Server, or the one saying smtp.farmside.co.nz
3. Ensure "SSL" is Green/Enabled
4. Ensure the User Name is your full Farmside email address, including the @farmside.co.nz, highlighted below
5. Click Done to confirm

Then to change the Incoming Settings, click on "Advanced Settings", and ensure "SSL" is Green/Enabled:
