

Three simple steps to get online

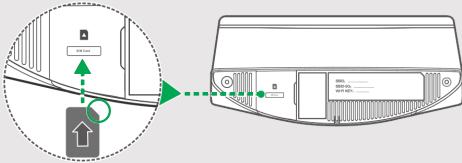

Your new Farmside SIM card is here and getting set up is a breeze. Just follow these steps to get online.

1

Unplug the modem from the power plug and remove the current SIM card by pushing the SIM card in to release it and then sliding it out.

2

Insert the new SIM card into the same slot and please ensure the SIM card is facing the right direction.

3

Plug your modem back into a power plug - the best place for a strong connection is near a window. When the  symbol changes from red to blue, you're connected to the network. This can take up to a minute.

Manage your account the easy way!

With the click of a few buttons, 24/7, you can manage your account, keep track of your usage, and a whole lot more. Visit www.myfarmside.co.nz to get started.
